We are excited to meet you at your upcoming appointment at our **La Jolla Office**. There is a detailed map included in this packet.

Audiology is the assessment and treatment of hearing disorders. Audiologists are hearing healthcare professionals who identify, assess, and manage disorders of the auditory system. They select, fit, and dispense amplification devices such as hearing aids and assistive listening technology to help you hear clearer and better. Essentially, your audiologist provides rehabilitation to improve the quality of your hearing.

Your initial evaluation will be a hearing screening to determine if any hearing loss is present. It takes about an hour. During this time, your audiologist will take a thorough history of your situation. If necessary, she will perform a hearing test while you sit comfortably in a sound booth to listen for various tones and words. She will also take a look inside your ear canal to look for obstructions or other factors, which may cause a hearing loss. After the evaluation and if it is determined that a hearing aid is necessary, your audiologist may recommend a medical referral to a doctor or work with you on selecting the most appropriate hearing system.

At PHC, you will find a wide selection of hearing instruments from the most advanced fully digital hearing aids to basic analog hearing aids. Your audiologist's main objective is to find the most comfortable, affordable, and appropriate hearing device for your individual needs and lifestyle.

We look forward to seeing you!
